

Nestlé Waters North America Environmental Policy

Nestlé Waters North America core beliefs are for respect for each other, our community and our environment. As such, we have a commitment to support and practice environmentally sound principles in all aspects of our business. We strive for continuous improvement through a reliance on sound science, application of the Nestlé Waters Environmental Management System (NWEMS), and other good management practices.

Our mission is to:

- Ensure compliance with all applicable local, state and federal environmental regulations and the Nestlé Policy on the Environment.
- Optimize the preservation and restoration of open spaces
- Protect, and sustain groundwater sources and surrounding eco-systems
- Conserve all raw materials and minimize waste in operations
- Expand recycling practices in operations and promote curbside recycling
- Support water education and appreciation
- Provide educational support and training to employees
